Summary

Computer Science Engineer with a B.Tech degree and hands-on experience in web application development using React.js, JavaScript, HTML5, and CSS3. Trained in MEARN stack development with exposure to REST APIs, database integration, and Agile workflows. Passionate about building scalable, user-friendly software solutions and eager to contribute to a dynamic IT team in an entry-level engineering role.

Skills

Programming & Scripting: C, JavaScript, Python (Basic – Academic), Java (Basic – Academic)

Web Technologies: HTML, CSS, React.js, Bootstrap

Backend & APIs: Node.js (Basic), Express.js (Basic), REST APIs

Databases: MongoDB, SQL (Basic)

Mobile Development: Flutter, Dart, Firebase

Version Control & Tools: Git, GitHub, Visual Studio Code

Design & UI Tools: Figma, Canva, Adobe Photoshop

Professional Experience

MEARN Full Stack Web Development Intern

August 2024 – March 2025

Luminar TechnoLab

Kochi, India

- Completed a 7-month intensive, hands-on MEARN stack training program focused on frontend and full-stack web development.
- Built responsive web applications using React.js, JavaScript (ES6+), HTML5, and CSS3 through real-world projects and assignments.
- Worked with RESTful APIs, basic state management, and database integration to develop scalable web solutions.
- Optimized UI components and improved application structure to enhance performance and maintainability.

Customer Service Executive (UK/US Operations)

September 2024 – April 2025

Amazon

Kochi, India

- Resolved 100+ customer interactions per shift in a fast-paced global environment, addressing service-related and basic technical issues.
- Maintained accurate case documentation while adhering to SLA and quality standards, contributing to efficient issue resolution.
- Strengthened communication, multitasking, and problem-solving skills while handling high-volume customer requests.

Projects

Cattle Management and Lumpy Skin Disease Detection System | *HTML, CSS, JavaScript, Python, Flask, Firebase*

- A web application created to detect Cow Lumpy Skin Disease while also providing tools for managing cattle expenses.
- This project integrates machine learning and web development to support farmers in tracking financial data and monitoring cattle health.
- Structured components and application logic to improve maintainability and usability.
- Executed core functionalities for managing cattle records, health details, and farm-related data.
- Track farm expenses and income with user-friendly data input.
- View monthly income/loss and gain insights into farm finances.

Vehicle Authentication Application | *Flutter, Dart, Firebase*

- Developed a cross-platform Flutter mobile application enabling users to securely access vehicle information, implementing Firebase authentication and real-time database integration to improve data retrieval efficiency by 30%.
- Created intuitive and user-friendly screens with consistent navigation flow.
- Connected the application to backend services to retrieve and display vehicle-related data efficiently.

Education

MEARN Full Stack Web Development

Luminar Technolab, Kochi

August 2024 - March 2025

B.Tech in Computer Science & Engineering

Amal Jyothi College of Engineering, Kottayam

2020 - 2024

Certifications

- **Fundamentals of Digital Marketing - Google**
- **The Joy of Computing Using Python - NPTEL**
- **Oracle Cloud Infrastructure Foundations - Oracle Academy**
